

(1) Write each of the following equations in standard form and draw them on the same set of axes:

(a) $y + 2x - 1 = 0$

(b) $3y - x = 6$

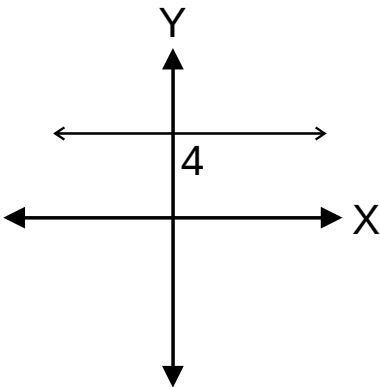

(2) Find the equations of the following straight lines:

(a) through the point $(0 ; -1)$ with a gradient of 2.

(b) through the points $(4 ; 0)$ and $(-2 ; 6)$.

(c)

(d)
